

# GPSA Educational Resources

## CLINICAL TOPICS

### Introduction

Over the past few years, GPSA has developed a large number of educational resources to assist supervisors in their role. These comprise a wide range of formats, comprising teaching plans, guides, webinars (and related FAQs), online learning modules and flash cards. They cover topics related to supervision, teaching and assessment, as well as core clinical content.

The most comprehensive educational resource covering clinical content are the teaching plans. These plans have been developed as an 'off-the-shelf' in-practice teaching resource for GP supervisors. They cover a wide breadth of common and serious clinical presentations and problems managed in Australian general practice. They include key references and exam-style questions.

Increasingly, the GPSA teaching plans have been recognised as a repository of high quality, up to date learning material directly relevant to GP registrars for independent preparation for College examinations.

Additionally, there are webinars, FAQs and other resources which cover clinical content.

GPSA has identified the need to collate all their educational resources to make them more accessible. As part of this process, this document has been developed to categorise the clinical educational resources. Its aim is to assist supervisors and registrars to incorporate these resources into in-practice teaching and examination study plans.

We have categorised the clinical resources into the following headings

- BEACH top 30 most frequently managed reasons for encounter (presentations)
- BEACH top 30 most frequently managed problems
- ICPC2 body system chapter headings
- RACGP high risk presentations.

## Thirty most frequent reasons for encounter (BEACH 2015-16)

Presentation	Teaching plan(s)	Other GPSA resource
Prescription	<a href="#">Antibiotic prescribing</a> <a href="#">Rational prescribing</a> <a href="#">Mechanics of prescribing</a> <a href="#">Polypharmacy and deprescribing</a>	<a href="#">Rational prescribing guide</a>

## ICPC2 body system chapter headings

ICPC is divided into 17 chapters by body systems representing the localisation of the problem. As well, there is a chapter for general and unspecified issues, and a chapter for social problems.

ICPC2 Chapter Heading	Teaching plan(s)	Other GPSA resource
<b>A General and unspecified</b>	<a href="#">Antibiotic prescribing</a> <a href="#">Rational prescribing</a> <a href="#">Mechanics of prescribing</a> <a href="#">Polypharmacy and deprescribing</a> <a href="#">Health assessments and screening</a> <a href="#">Navigating Medicare</a> <a href="#">Rational test ordering</a> <a href="#">Workers compensation</a> <a href="#">Immunisation</a> <a href="#">Fever in children</a> <a href="#">Fatigue</a> <a href="#">Genomics</a> <a href="#">Adolescent health</a>	<a href="#">Immunisation learning module</a> <a href="#">Chronic disease management learning module</a> <a href="#">Teaching Your Registrar about Chronic Disease Management and Related MBS Items FAQ</a> <a href="#">Teaching Your Registrar about Chronic Disease Management and Related MBS Items webinar</a> <a href="#">Wound management learning module</a> <a href="#">Addiction medicine webinar</a> Addiction medicine FAQ*
<b>B Blood, blood forming</b>	-
