

Child abuse

Child abuse is common. Internationally, between 5-20% children experience sexual abuse and 25-50% of children experience physical abuse. On average 25 children are killed by a parent each year in Australia. Child abuse can have lifelong consequences, in particular mental health issues. GPs are often the first port of call for families with children at risk. It is therefore critical that GP registrars be competent in prevention, identification and response to possible child abuse.

<p>TEACHING AND LEARNING AREAS</p> 	<ul style="list-style-type: none"> • Different types of child abuse • Presentations of child abuse to general practice, including non-accidental injury • Barriers to disclosure of child abuse • Safe ways to ask families about possible child abuse • Red flags for high-risk children • Indications for referral and referral pathways (forensic medicine, social work, hospital, child and family services) • Mandatory reporting obligations relevant to state of practice 				
<p>PRE- SESSION ACTIVITIES</p> 	<ul style="list-style-type: none"> • Read Chapter 6 of the RACGP White Book Abuse and Violence • Ask your registrar to reflect on any cases of child abuse that they have been involved with 				
<p>TEACHING TIPS AND TRAPS</p> 	<ul style="list-style-type: none"> • Children under the age of 12 months are most at risk • Children with physical injuries may need to be referred to hospital for a comprehensive assessment • It is common for domestic violence and child abuse to co-occur. In these families it may be either the male, female or both who are perpetrating violence towards children. • When examining children, it is important to talk to them and explain that you are only examining them because you are a doctor and to help them to understand why they are sick

Child abuse

Clinical Reasoning Challenge

You see 4-year-old James with his 32 year old mother Harriet. James presents for an updated asthma plan. On examination of his lungs, you notice a large bruise on his lower thigh that looks like a hand mark. On questioning, Harriet admits that her husband sometimes gets upset with James and on a number of occasions has struck him either with his hand or with his belt.

QUESTION 1. You are concerned about physical abuse. What are FOUR other types of child abuse that you need to consider at this point?

1 _____

2 _____

3 _____

4 _____

QUESTION 2. What do you need to do next in this consultation?

QUESTION 3. What else do you specifically need to ask Harriet about?

Child abuse

ANSWERS

QUESTION 1

You are concerned about physical abuse. What are FOUR other types of child abuse that you need to consider at this point?

- Emotional/psychological abuse
- Sexual abuse
- Neglect
- Exposure to intimate partner violence

QUESTION 2

What do you need to do next in this consultation?

- A thorough examination, explaining what you are doing as you examine. Document all injuries.

QUESTION 3

What else do you specifically need to ask Harriet about?

- Intimate partner violence. It is common for child abuse and domestic violence to co-exist.
